

Ilan Lenzner

CREATIVE TECHNOLOGIST / DESIGN ENGINEER

Senior Product Designer who ships production code - React/TypeScript, native macOS & iOS apps, AI pipelines

Tel Aviv, Israel · Available immediately · ilans.net · github.com/ilan-stack · linkedin · ilanlentsner@gmail.com · +972-54-567-6468

SUMMARY

I design **and** build AI-powered tools - the experience and the working software. I design the product, then ship it myself: React/TypeScript on the web, native macOS and iOS apps, and AI pipelines wired into real workflows. My AI tools are used daily by 100+ creative professionals, and my work is public on GitHub and live on the App Store. A career spanning creative direction and ad-tech, B2B SaaS at scale, clinical software, and applied-AI product tooling. As production design gets automated, my edge is design judgment plus the ability to build what I design.

SELECTED WORK — DESIGNED AND BUILT

- TaperSafe** - medication-taper iOS app, live on the Apple App Store. React Native + Supabase. Built end to end.
 - Lola** - personal AI assistant with 240+ tools, multi-LLM (TypeScript / Node). Designed the UX and built the system.
 - InkForge** - native macOS drawing app (Swift) with a custom canvas and rendering engine.
 - Lens** - cross-browser accessibility extension (Chrome + Firefox) with AI-generated image alt-text.
 - Sprite Studio** - video-to-spritesheet AI pipeline for game and ad production.
- More (Auto-Caption, Cubelets) at ilans.net and github.com/ilan-stack.

EXPERIENCE

- Senior Product Designer - Sett**

2025 - 2026

AI tools for a ~100-person playable-ad production team

 - Designed an AI-driven character-animation pipeline with a human-in-the-loop review step so motion leads kept creative control - cut per-asset turnaround from ~4 hours to ~15 minutes, now a daily team-wide workflow.
 - Shipped 5 After Effects extensions with AI built directly into the motion team's workflow, removing context-switching from their day.
 - Built and own the design system across 15+ internal AI interfaces - shipped in code - to speed engineering handoff.
- Design Lead, Digital Health - Rabin Medical Center**

2023 - 2025

Clinical software used across 4 hospital departments

 - Designed dashboards and patient-facing flows now in daily use by clinical staff across 4 departments.
 - Led UX research with physicians and nurses; translated clinical needs into a shipped AI patient-engagement system.
 - Authored the team's guidelines for using generative AI in clinical tools, adopted across the digital-health team.
- Product Designer - PlayBatch**

2022 - 2023

Sole designer on an 8-person product team

 - Led UX/UI for AI-powered creative tools, replacing manual workflows with designed automation interfaces.
- Product Designer - Bites**

2020 - 2022

B2B SaaS for employee engagement, 10,000+ enterprise users

 - Built the design system (tokens + reusable components) that became the single source of truth for design-to-dev handoff - engineers shipped from spec without back-and-forth.
 - Shipped end-to-end UI/UX for core product features from research to release across enterprise clients.
- Creative Director - justAd → Market Group**

2013 - 2020

 - Led a 12-person team across mobile ad campaigns for Fortune 500 clients.
 - Built a modular ad-template system that cut production time ~60%.

SKILLS

- Build**

React, TypeScript, Next.js, Node.js, HTML/CSS, Tailwind, Git/GitHub, REST APIs · Native: Swift (macOS), React Native (iOS). I ship production software, not just prototypes.
- AI**

LLM app integration (Claude, OpenAI), Replicate pipelines, human-in-the-loop UX, AI tooling shipped to production.
- Design**

Figma (advanced prototyping), design systems & tokens, in-code prototyping, UX research, interaction design, accessibility (WCAG), motion.
- Tools**

After Effects, Blender, Adobe Creative Suite.
- Languages**

Hebrew (native), English (fluent, professional).
